Why payUP

PayUP is startup by a 17 year old boy from the Netherlands who spend 2 weeks to make it and will update it regularly.

Security

Users who wants to pay with PayUP need an PayUP account the logindata is all stored safely

Signing up for payup as company

Go to the website select signup check the checkbox company why would you like that ?
Lower tax rate, contact with the developer and more possibility's.

What do you lose ?

Future possibility to have multiple bank accounts

Requirements

Payup companies need an website need to have acceptance from the PayUP team
Also we need to have authentication that you are in the head of the company (we don't like random persons asking company accounts for lower taxes)
If the requirement aren't met your money will be wired to the bank for future investments

How to Intergrate payup to your website

When users need to pay on your website you actually send them over to me people pay with PayUP by PayUP not an sketchy site

Authentication

TL;DR

What we need to receive

We need to receive the value, the description, the return URL and the accountID(from your company)

Form structure

So I did it like this

```
<form action="givemeyourvegetables.nl/Middleman.php" method="post">
  <input hidden type="text" name="value" value="" . $value . ">
  <input hidden type="text" name="destination" value="" . $youraccount . ">
  <input hidden type="text" name="description" value="" . $description . ">
  <input hidden type="text" name="return" value="" . $_SERVER['REQUEST_URI'] . ">

  <input type="submit" value="send" name="send">
</form>
```

IT NEEDS TO BE A POST!!!!!!1

Don't understand it ?
